

Group IT Integration Developer

Quant offers you an excellent opportunity to join our Group IT team in the role as Integration Developer. You will be the spider in the web when it comes to integrating internal systems as well as creating integrations to customers and suppliers. Are you ready for new challenges?

Location: Budapest, Hungary

Employment Contract Type: Permanent, Full time

About the position

We are looking for a .Net developer that wants to work with our integration platform and related applications.

We believe that you have a strong interest in creating smart integration solutions with at least a few years of practical experience developing .Net applications. You will be working closely together with our Integration Architect and the rest of Global IT team with development of new, as well as managing current integrations. The role will also handle problems and change requests as well as securing test and release of new functionality. We base our processes and way of working on ITIL and Scrum.

You have a passion and a commitment for technology and creative solutions combined with accountability and a professional attitude. You like being a part of a team with interpersonal skills who thrive on building relationships with our customers as well as within Quant. You are curious and have a clear drive in your approach and an ability to quickly take in new information and propose ideas based on this. As a person you are humble and has no problems sharing knowledge with your colleagues. As our Integration Developer, you will be the spider in the web when it comes to integrating internal and external systems and realizing connections to customers and suppliers.

Quant uses, to the most extent, development platforms, products and cloud solutions from Microsoft. The internal integrations are centred around Quants ERP (MS AX Dynamics) and CMMS (Maximo and Infor). The primary integration platform is MS BizTalk Server and REST or web service-based integrations in Azure.

For questions, please contact:

Pia Hofstedt, CIO, Phone: +46 70 757 00 39

The way we see you:

- 3+ years of programming .Net based solutions in C#
- 2+ years' experience of Microsoft SQL server
- Interest and understanding in distributed architectures, asynchronous paradigms, REST and web services
- Knowledge of Azure and cloud environments
- University degree in Computer Science, Information Systems or a related field / required experience
- Fluent in English (written & oral)
- Excellent communication skills
- High customer orientation, capacity to manage priorities
- Willingness to travel
